

Camera Inspection

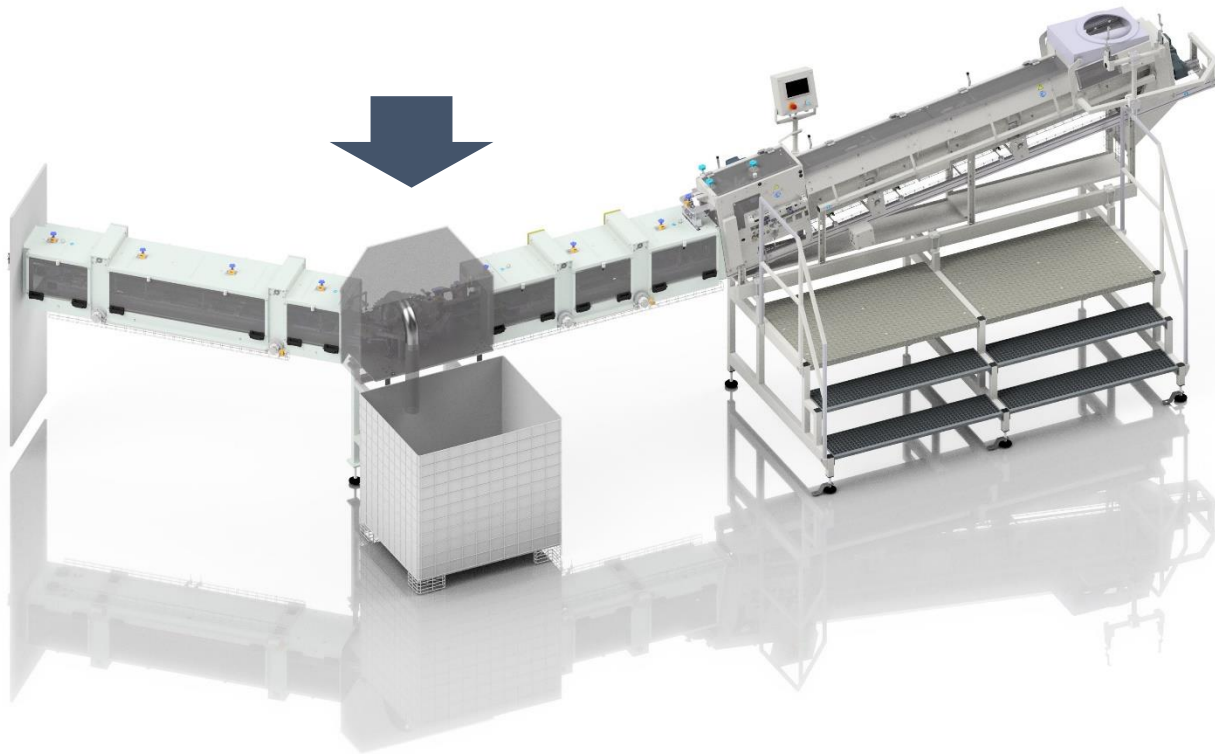

As a part of the floor-level

Preform Line ergo

1

CIT ergo – Innovation for floor-level Preform Lines

Description

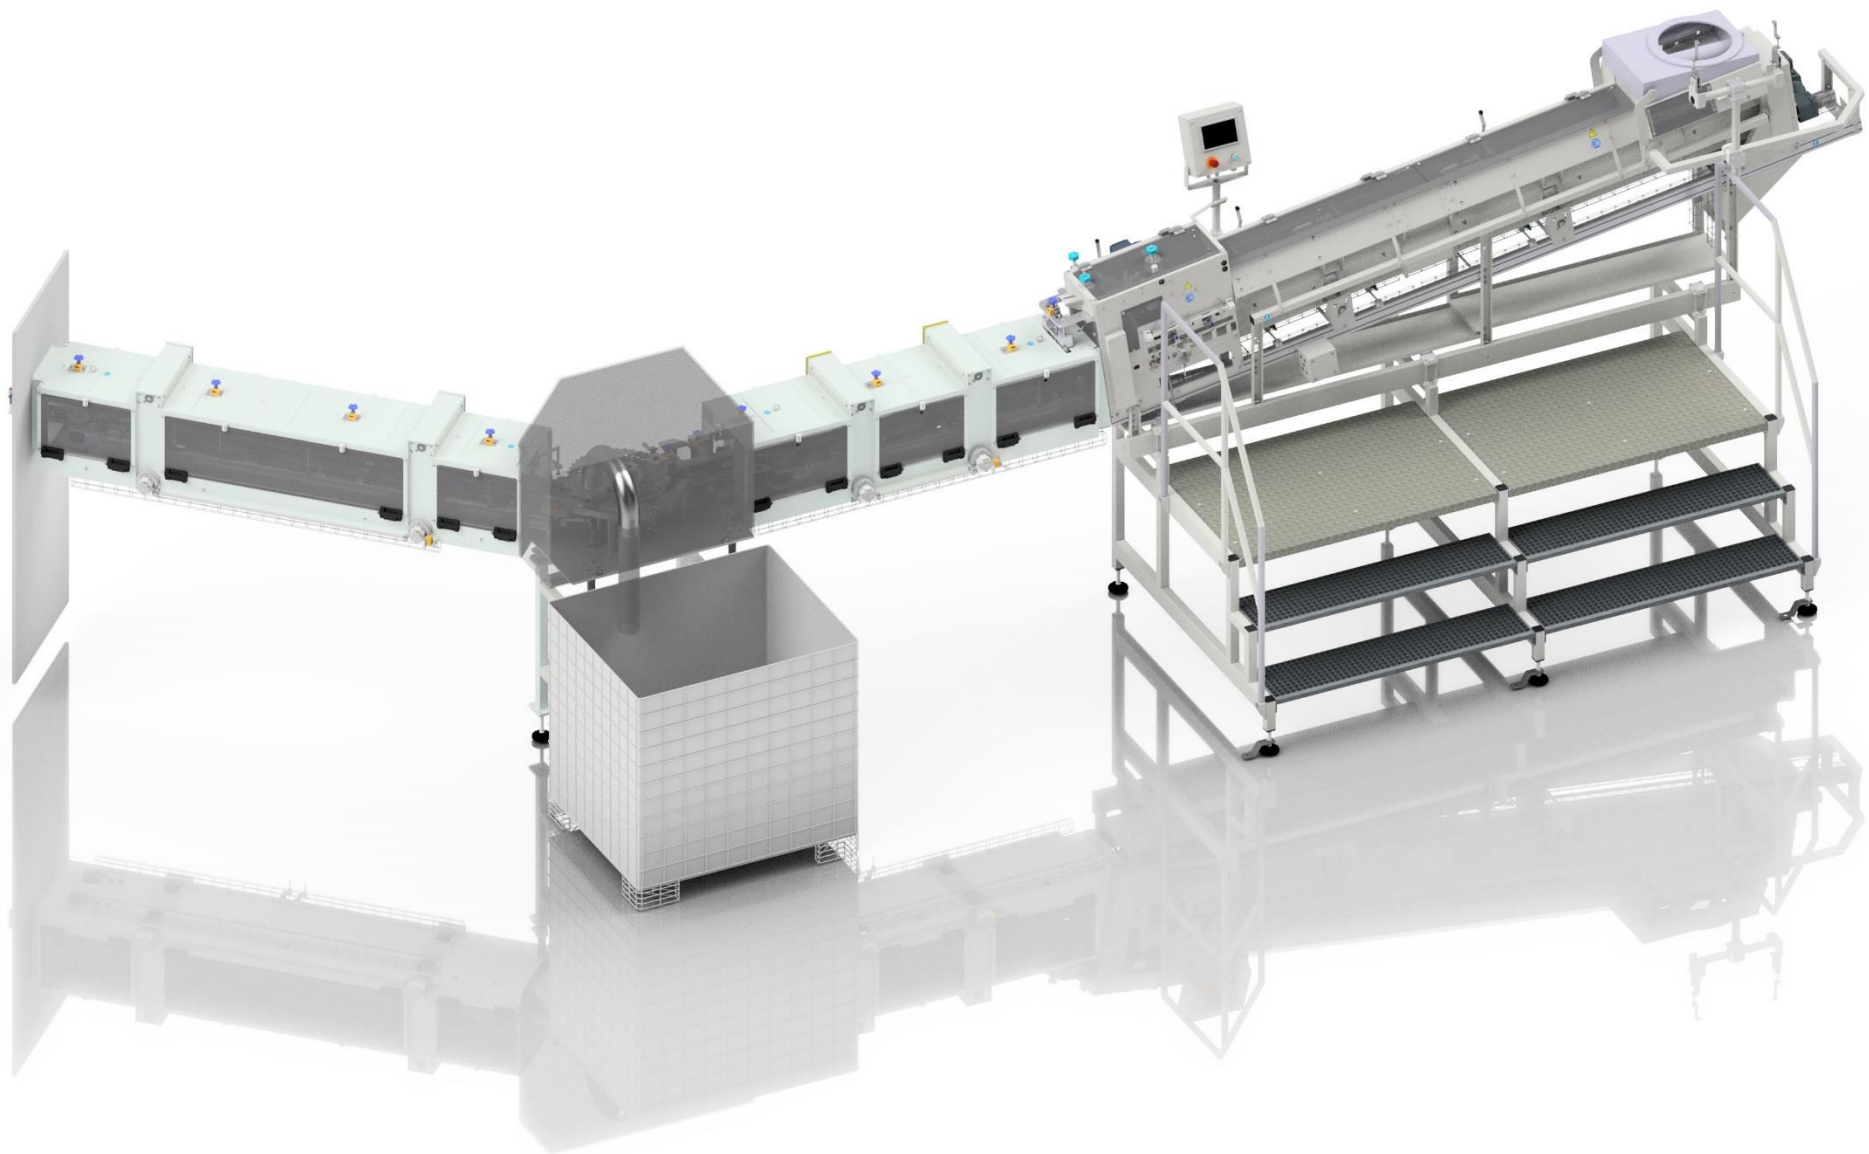

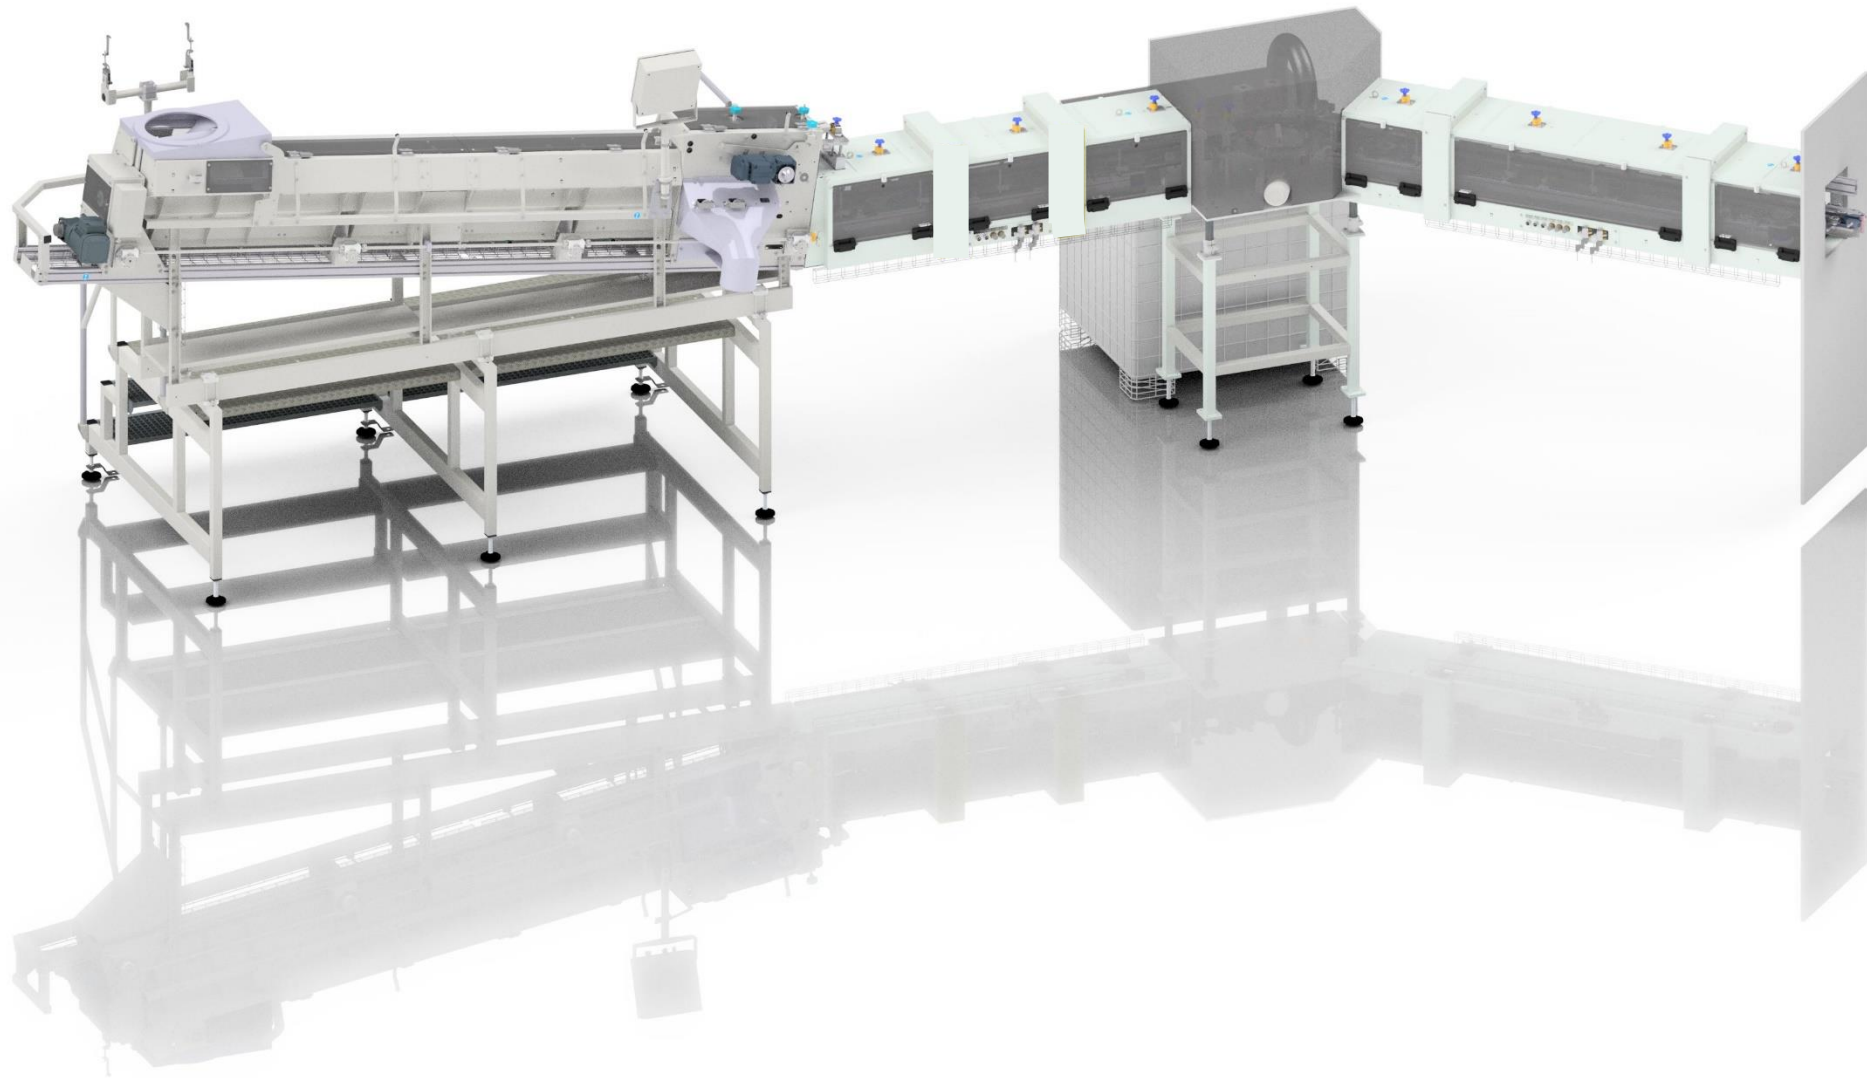

CIT ergo – Camera Inspection

- _ Camera inspection directly in front of the blow moulder.
- _ Integrated ejector without production stop.
- _ Speed up to 100'000 p/h.
- _ Active regulation and gap-closing due to ErgoFlow.
- _ No gaps in the blow moulder.
- _ Inspection of ovality and sealing surface (camera 1).
- _ Inspection of the injection point (camera 2).
- _ Inspection of color deviation (camera 3).
- _ Full integrated into the Preform Line control.

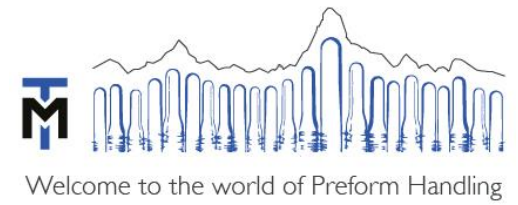

Conclusion

Only perfect preforms for the downstream process!
