

M. Tanner AG  
Switzerland

**PERFECTION  
DRIVES US.**

SINCE 1973.

# WELCOME TO THE WORLD OF PREFORM HANDLING.

We have been developing and producing preform handling systems for our customers worldwide for over 40 years. Over 3,500 systems are currently in operation. What began with the feeding of preforms into the blow moulder has seen many products and functions added over the years. From the loading of preforms in the first process step, the sorting and feeding of preforms, through to complex quality optimisation, we cover the entire preform handling process upstream of the blow moulder or the inspection system.

Our after-sales management provides comprehensive support for all products we supply throughout their entire service life.

We are there when you need us.

**Marco Tanner and the entire Tanner team.**

*The Swiss family business is managed by Marco Tanner in the second generation. Marcel Tanner founded the company in 1973 and handed it over to his son Marco in 2012.*

# EXCELLENCE IN TECHNOLOGY.

## FACT NO. 1

### Logistics

Safe and efficient preform loading is the priority. Whether manually, with an automatic feed or with a driverless transport system – we offer various options tailored to your needs.

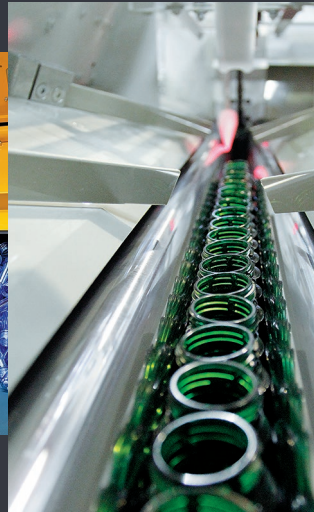

*The first step towards setting up your successful PET line.*

## FACT NO. 2

### Soft handling

Gentle handling of the preforms, especially when tipping, results in higher product quality and process reliability. The increasing use of rPET means soft handling is the future.

*Soft handling for a lower scrap rate.*

**FACT NO. 3**

## Preform feeding

High-efficiency orientation and feeding of preforms at all speed ranges – regardless of your preform design. For us, the heart of every preform line.

*For you, the key to higher efficiency.*

**FACT NO. 4**

## Floor-level system

The ErgoFlow, our latest innovation, permits floor-level, horizontal feeding of the preforms into the downstream machine (without air). Higher efficiency, space-saving, quick access, safe maintenance.

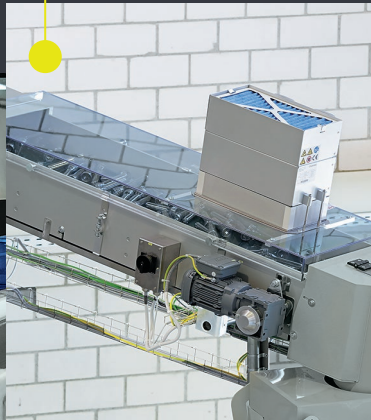

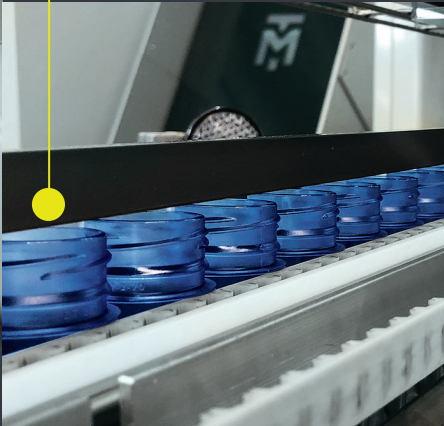

*Fewer stairs and platforms, greater safety and quicker access.*

**FACT NO. 5**

## Aseptic

From the use of the worldwide unique air rinser (plus camera inspection) directly before the blow moulder to germ reduction at the mouth and thread, to a “hygiene tunnel” for the complete preform line, we offer a broad, diverse portfolio.

*For your product safety.*

# THREE REASONS WHY M. TANNER AG IS YOUR IDEAL PARTNER.

## A Swiss family business.

In the market since 1973 with continuously leading products. Right from the start, the traditional Swiss company successfully established itself worldwide. Swiss quality is paramount. Like father – like son.

# 1

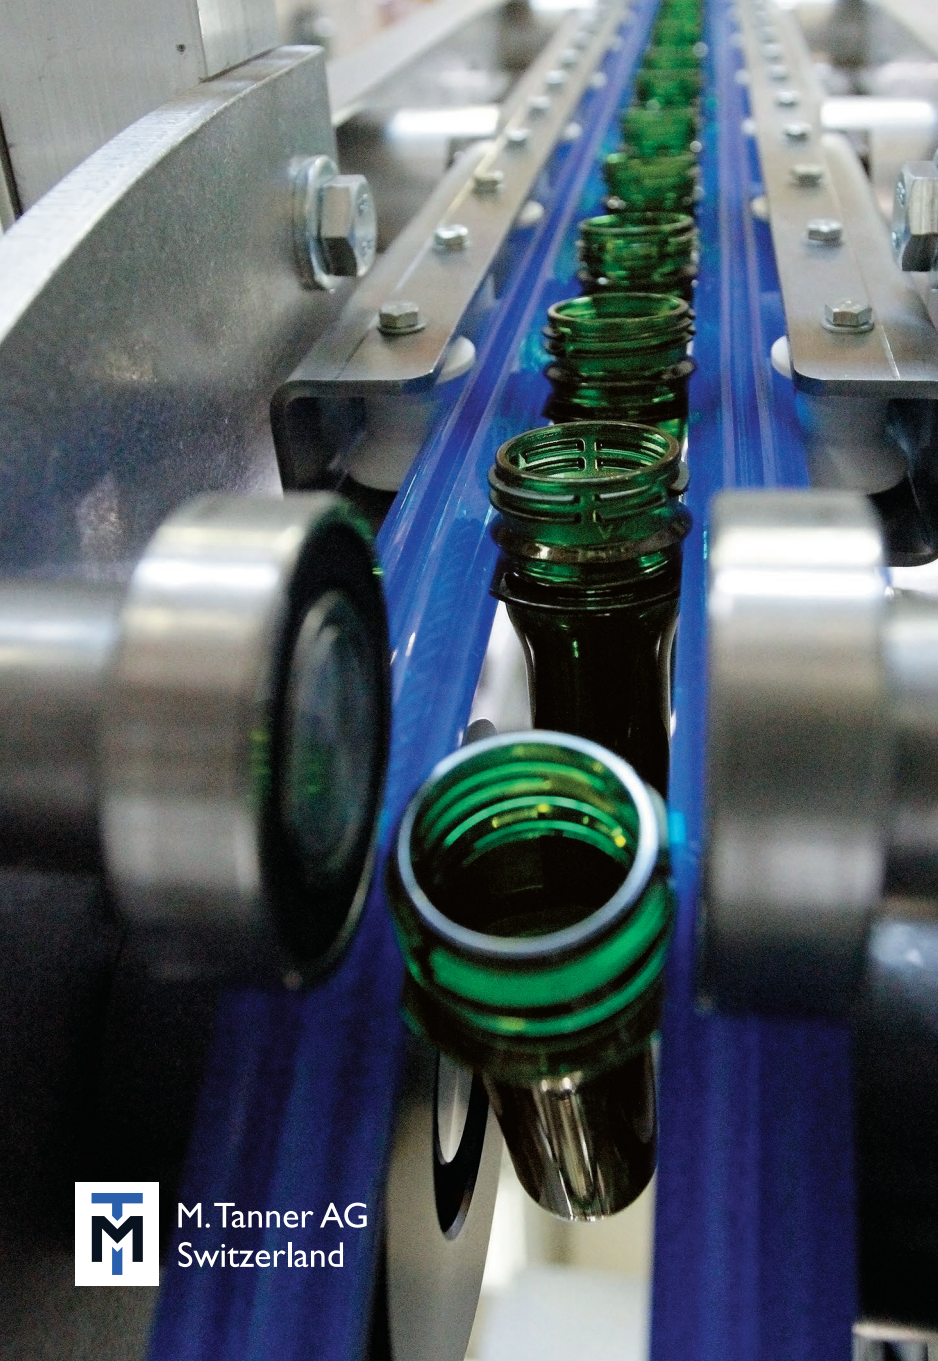

## 2 Driven by perfection.

Technical excellence, coupled with innovative strength, is the icing on the cake. See for yourself and get in touch. It will give a boost to your business.

## Decades of experience.

We have decades of experience in the development and design of preform handling systems. The difference is in the detail. This advantage has a positive impact on your production efficiency.
